## Morrisby's Career of the Month— Machine Learning Engineer

Machine learning engineers create programs to enable technology to perform actions without explicit programming or direct human interaction, for example, self-driving cars, using data structures, algorithms and computer architecture. The role of the machine learning engineer is normally quite well-defined due to it being one specialist part of artificial intelligence (AI). Read more about it [here](#).

## Grierson DocLab Programme

Returning for the 12th time, the [Grierson DocLab core programme](#) is for UK-based 18-25 year olds with a passion for documentary and factual TV who are new entrants to the industry. No experience is required and candidates don't need to have studied film/TV to apply either. They especially welcome applications from those under-represented in the industry, and aim to equip 12 successful trainees with the knowledge, connections and work experience to launch their doc careers. Deadline to apply 23 February, with a [webinar](#) to find out more taking place Tues 23 January.
